

ARMOR[®] FROM LOCHINVAR

CONDENSING WATER HEATER

With ten models from 400,000 to 4,000,000 Btu/hr input, ARMOR will service a large range of commercial applications and add the “green” touch that building owners and facility managers desire.

- 10 Models from 400,000 to 4,000,000 Btu/hr
- Up to 99% Thermal Efficiency
- AWH0400NPM- AWH1000NPM 10:1 Turndown Ratio
- AWH1250NPM - AWH4000NPM 5:1 Turndown Ratio
- Direct Vent Flexibility Up to 150 feet
- SMART TOUCH™ Operating Control and CON-X-US® Remote Connect

AN INNOVATION IN COMMERCIAL WATER HEATING

Couple the ARMOR with a Lock-Temp Storage Tank for long system life and high performance.

Does your project require a creative water heating solution?

Optimize system footprint, deliver the best system appearance and reduce installation cost by considering a custom-built water heater package for your application. Fully assembled and tested at the Lochinvar factory to meet the requirements of the job. All packages include a welded channel iron skid for equipment mounting providing increased efficiency and reduced time on-site!

STAINLESS STEEL CONDENSING HEAT EXCHANGER

The heart of the ARMOR is the advanced and superior grade 316L Stainless Steel, condensing heat exchanger to achieve as high up to 99% Thermal Efficiency. Design features a slide-out door for improved accessibility and maintenance flexibility.
