

**NO ONE BRINGS IT ALL TOGETHER
LIKE LOCHINVAR**

The SHIELD™ commercial water heater features an advanced water heating system. All utility connections are located at the top of the appliance. An overall beautifully packaged design reduces space required to the smallest possible footprint, increases installation flexibility and improves serviceability.

10 MODELS FROM 125,000 TO 500,000 BTU/HR

UP TO 96% THERMAL EFFICIENCY

5:1 TURNDOWN RATIO

DESIGN PREVENTS LIME SCALE
BUILDUP

SMART CONTROL™

CONXUS

LIME SCALE FREE FOR LIFE

The SHIELD water heater provides effective defense against a water heater's worst enemy - lime scale buildup on the tank and heating surfaces. Tank type water heaters suffer from one thing the SHIELD does not, lime scale buildup. Lime scale insulates the water from the heat source, decreasing thermal efficiency and increasing operating costs. Just a ¼" of lime scale will increase fuel consumption and raise operating costs as much as 25%. Shield has no flue tubes inside the tank. The water is heated in a separate stainless steel heat exchanger mounted above the tank. By controlling and creating high water velocity through the heat exchanger, the heat surface areas are kept clean so thermal efficiency remains high, for life.
