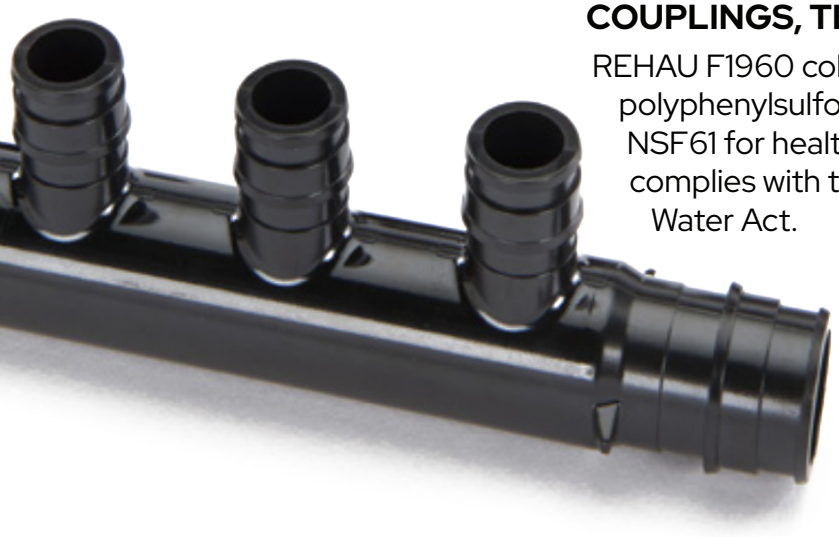
REHAU

Our crew stands behind you.

REHAU F1960 Cold Expansion Fittings

Fitting system consists of ASTM F1960 cold expansion fittings (REHAU F1960 fittings) in polymer and lead-free brass, and PEX reinforcing rings (PEX rings), for use with REHAU PEXa UV shield pipe for potable plumbing system applications and RAUPEX O, barrier pipe for hydronic radiant heating and cooling system applications (REHAU PEXa pipe).

The REHAU F1960 fitting system is available in ⅜", ½", ⅝", ¾", 1", 1-¼", 1-½" and 2" sizes and is intended for use with REHAU PEXa SDR9 copper tube size (CTS) pipe manufactured in accordance with ASTM F876.



COUPLINGS, TEES, ELBOWS, MULTI-PORT TEES, PLUGS

REHAU F1960 cold expansion polymer fittings are produced from a polyphenylsulfone (PPSU) material that meets the requirements of NSF61 for health effects of drinking water system components and complies with the lead-free requirements of the U.S. Safe Drinking Water Act.

Don't have time to train your crew on a new installation technique? Ask for REHAU F1960 at your local distributor to capitalize on your team's experience and move projects along quickly.
