## tekmarNet® Thermostat 557

Radiant Floor,  
2 Heat Pump/Cool, Backup,  
Humidity

### The Best in Heat Pump and Radiant Floor Control

The tekmarNet® Thermostat 557 is a communicating touchscreen thermostat designed for hydronic radiant floors with a two-stage heat pump and backup heat, or for two stages of heating and cooling. It supports up to three auxiliary sensors (room, floor, outdoor, or duct), offers optional floor sensing for precise radiant control, and measures and controls humidity with built-in or external sensors. The large touchscreen allows easy 7-day scheduling for comfort and energy savings, and it can connect to tekmarNet® controls or operate as a stand-alone device.

#### Features

- Warm weather shut down, zone synchronization
- Zone post purge, programmable schedule
- Temporary hold, away scene key
- Auto heating cycle, tekmarNet® communication compatible
- Touchscreen technology, 3 Auxiliary sensor inputs
- Radiant floor heating and cooling, outdoor and floor temperature display
- Air group master, network schedule master or member
- Optimum start, scenes
- Daylight savings time, backlight
