

A **WATTS** Brand

Snow Melting Controls

Tekmar Control Systems is the trusted leader in the snow melt industry providing an entire system solution.

Experts in snow melt design, installation, operation and best practices including mechanical and control considerations.

In-Slab Snow & Ice Detection

- Design with a Snow / Ice Sensor 090 for a fully automatic melt cycle
- Most reliable, reputable sensor in the industry.
- Allows for on/off or idling operation.

You need to account for snow and ice, otherwise you are doing your clients a disservice.

- Safety
- Cost of snow removal
- Convenience

Aerial Snow Sensor 095

- An aerial snow sensor may be considered if:
 - It is impractical to locate an in-ground sensor in the slab or pavers
 - The concrete was mistakenly poured without the socket
- The Snow Sensor 095 can be installed to provide an automatic start with a timed stop

- Chemical damage concerns
- Risk of liability
- Reduced maintenance
