BATHS Select By Style

SculptureStone®

Feel the difference with this Engineered Solid Stone, a mixture of finely ground natural minerals and high-performance resins that are liquefied, poured and hardened. The result is molded stone that is 100% solid, with the same non-porous high-performance properties through and through. Superior solid surface. The finest on the market.

Mineral Composite

High-quality mineral composite mixture of ground natural elements and high-grade binding agents, with a tough, state-of-the-art chemically-bonded coated finish specially formulated for MTI. The same type of material used on the hulls of multi-million-dollar yachts. Beautiful, non-porous, durable and easily maintained.

DoloMatte®

A thick, American-made solid-surface slab of specialty polymer blended with ground minerals that is consistent in color and property. After a preparation process, it is thermoformed and reinforced with a thick layer of fiberglass, resin and titanium. Luxurious design aesthetics. An exquisite matte finish with a velvety-soft touch and feel. True solid surface.

Acrylic CXL®

American-made glossy continuous cross-linked cast acrylic, which is the finest in the world for bath applications. The acrylic shell is uniform in thickness and consistent in color and property. It is thermoformed and reinforced with a substantial backing of fiberglass, resin and titanium.
