

Taco Comfort Solutions Training Event

Join us for a hands-on workshop with Taco expert Jason Kockx. Geared toward contractors and wholesalers, this training covers real-world troubleshooting, product selection, and control strategies you can use right away. Whether you're new to Taco or a seasoned pro, you'll gain practical insights you can apply in the field.

- ◇ Circulators Facts, Curves, Selection & placement
- ◇ ECM Essentials, "From 3 to 300 GPM" Modes set right!
- ◇ Zone Valve vs Zone Pumps
- ◇ Zone Valve Controls / Sentry Zone Valves
- ◇ DHW Re-Circ essentials "Know why the 'system' is failing"

Jason Kockx CPI Service Solutions Manager

Jason Kockx is Taco's Western Product and Application Instructor, bringing decades of plumbing and hydronics experience. With a background in wholesale distribution at Cal-Steam and Ferguson, he's known for his technical expertise and dedication to advancing hydronic heating in the Western U.S.
